Wall Mounting Screws

Screw Tool
WiFi Antenna
Start Up Guide

Be ready

You will need your WiFi router password. Write it down below so its handy when you need it!

Get Started

Please complete set up before mounting the camera.

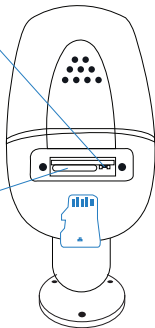

Connect the camera to the mains using the power adapter provided.

The red LED will come on once plugged in and the camera will chime before it is ready to connect.

If you would like the camera to record, you will be required to insert a Micro SD card. The camera will support any sized Micro SD card up to 128 GB.

Flashing Red
Ready to connect

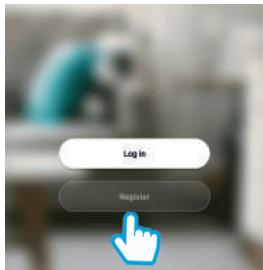

Solid Blue
Connected

Download App

Download the “Clan at home” App on the iOS App Store or Google Play Store.

Register

Step 1

Select Register, carefully read the Privacy policy and select Agree if you would like to progress

Register

United Kingdom

Continue

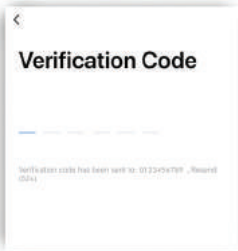

☐ I agree with Service Agreement and Privacy Policy

Step 2

Enter your email address

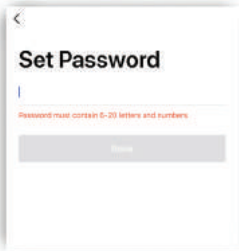

Register

A mobile app screen titled "Verification Code". It features a back arrow in the top left corner. Below the title is a horizontal input field with six segments, each containing a dot. At the bottom, a message states: "Verification code has been sent to: 0123456789 @example.com".

Step 3

Enter the verification code
sent via email

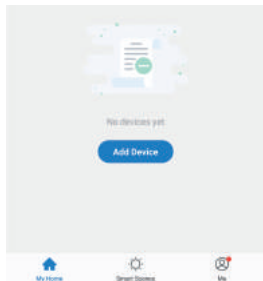

A mobile app screen titled "Set Password". It features a back arrow in the top left corner. Below the title is a password input field with a blue vertical line on the left. Below the input field, a red error message reads: "Password must contain 6-20 letters and numbers". At the bottom is a grey button labeled "Done".

Step 4

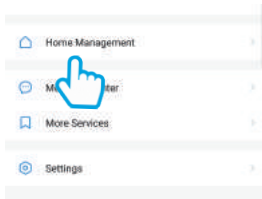

Create your password to login

Add Home

Step 1

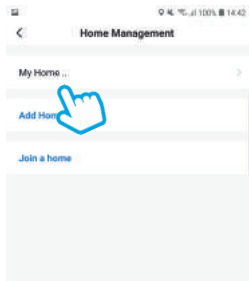

Click Me in the bottom right hand corner

Step 2

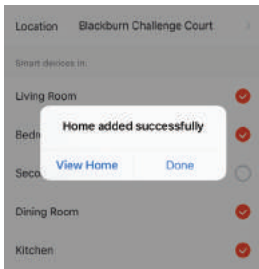

Select Home Management

Add Home

Step 3

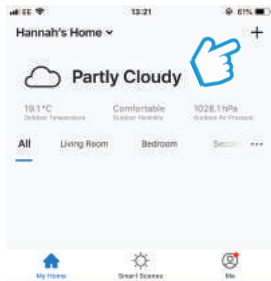

Select My Home. Enter a name for your home and a location.
Click Save

Step 4

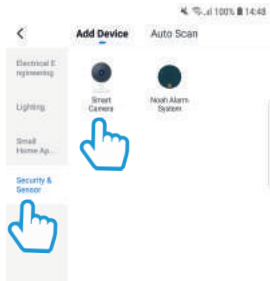

Select Complete and your home will be created.

Add Camera

Step 1

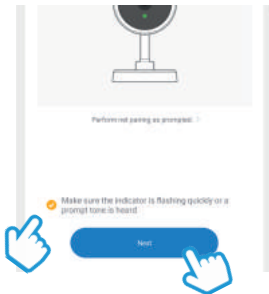

In My Home, click the (+) icon in the top right-hand corner of the screen

Step 2

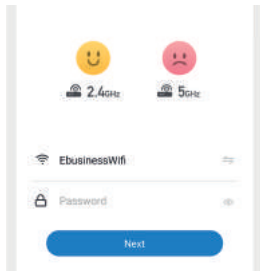

Select Security and Sensors on the left hand side and click Smart camera

Add Camera

Step 3

Make sure the LED indicator is flashing red, then select the tick box and press Next

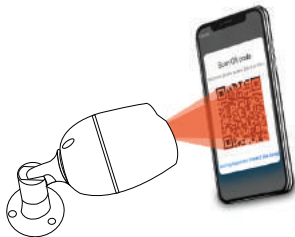

Step 4

Enter your WiFi router password
Then press Next

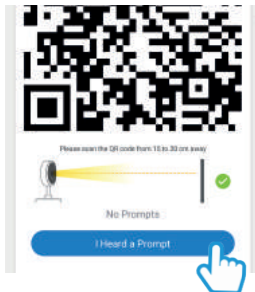

Add Camera

Step 5

Remove the plastic film from the camera lens

Hold your phone up to the camera as described in App

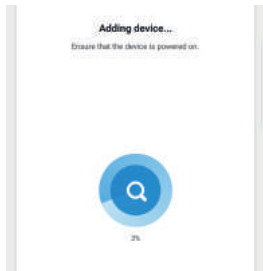

Step 6

If you heard the camera chime, press I Heard a Prompt.

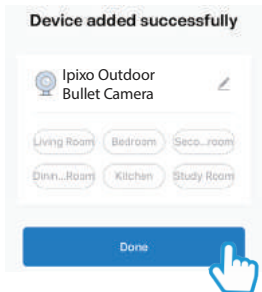

If you don't hear the chime, reposition the camera in front of the phone and scan QR code again.

Add Camera

Step 7

The camera will then establish a connection to Clan.

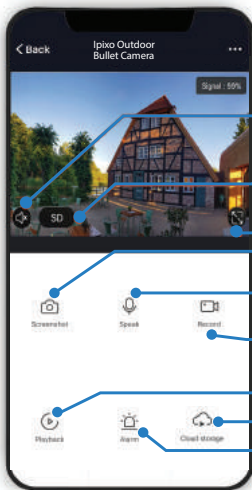

Step 8

Once connected you can change the camera's name and select the room it's in.

Press Done

Live View

Hear what is happening around the camera

Select the video quality (lower quality may broadcast more smoothly)

Turn on to get instant alerts to your phone when there's movement

Add SD Card

If you would like the camera to record you will be required to insert a Micro SD card. The camera will support any sized Micro SD card up to 128 GB.

Step 1

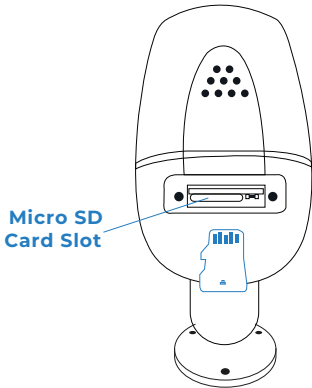

Turn off power to the camera.

Step 2

Find the Micro SD card slot on the underside of the camera and insert the card into the slot far enough for it to click into place.

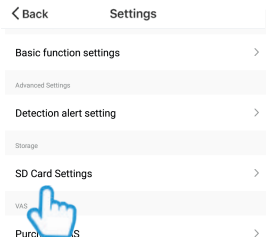

Step 3

Turn the power to the camera back on.

Format SD Card

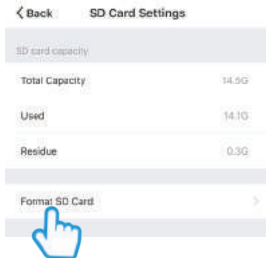

Before the camera can start recording you will have to format the micro SD card.

Step 3

Select your camera and click on the pencil icon in the top right

Select SD Card Settings.

Step 4

Click Format SD Card and press confirm, the camera will begin to format the Micro SD card.

Please note: it will take a couple of minutes to format the card.
