This user manual has all the information you need to make the most out of Oscar 2 Outdoor Camera. Please keep this manual for future reference and ensure you have read all safety instructions carefully before use.

The manual is subject to change without notice. The updates will be added into the new version of the manual.

What you'll need

This is what you will need to set up your Oscar 2 Outdoor Camera

Wi-Fi broadband

A working internet connection on a 2.4Ghz frequency channel

Compatible Device

An Apple or Android Smartphone or Tablet PC

Clan at Home account

Download the Clan at Home app and register

Indoor Mains Power Supply

Direct access to an indoor power socket

Phillips Bit

A power drill with Phillips driver bit

Drill Bit

To install on surfaces such as brick or concrete

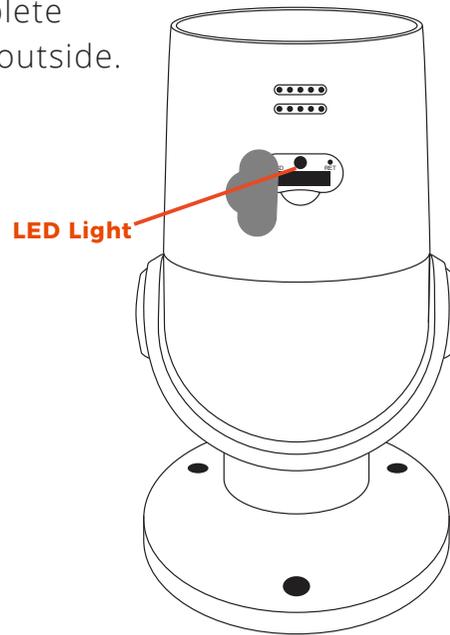

Let's get started

Power up Oscar indoors

Please turn Oscar on and complete set up indoors before taking it outside.

Using the power adapter provided, connect Oscar to a mains socket in the same room as your Wi-Fi router.

The red LED will come on once plugged in and Oscar will chime when it is ready to connect.

Add Oscar to the Clan at Home App

If you're setting Oscar up for the first time, you will need to:

1. Download the Clan at Home app from the Google Play Store or Apple App Store
2. Open the app and "register" to create an account
3. Create a Home
4. Then add Oscar

If you already have a Clan at Home account, simply press the "+" icon on the top right corner and follow the on-screen steps.

You will be asked to enter your Wi-Fi router password and use Oscar to scan the QR code created on your smartphone, then Oscar will connect to your W-Fi network.

What do the flashing lights mean?

Solid Red
Starting up

Flashing Red
Ready to connect

Solid Blue
Connected

If you need help with this, please refer to the Quick Start Guide included with Oscar 2.

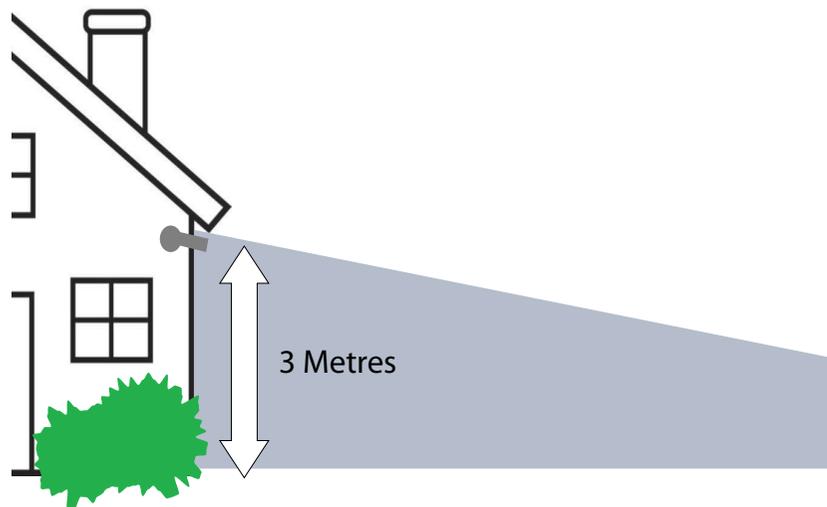

You can also watch a video on how to set up Oscar 2, visit: www.time2technology.com/product-downloads

Installing Oscar

Choose a good spot

Oscar 2 has an adjustable head and a wide field of view so you can position it in any direction you want.

We recommend that you mount Oscar at around 3 metres above the ground, this is the ideal position for Oscar to sense movement, see faces and talk through the speaker and microphone.

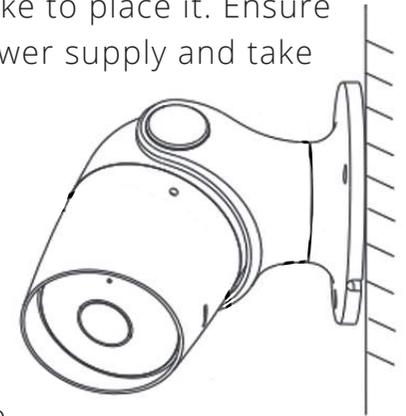

Ensure that Oscar is mounted in a position that allows you to see over a large area of your home and surroundings with an unblocked, clear view.

Test the Wi-Fi signal

Before mounting Oscar, we recommend that you test the Wi-Fi strength in the area that you'd like to place it. Ensure Oscar is still plugged in to a mains power supply and take it outdoors.

Hold Oscar in the position that you would like to mount it and check that the live stream is working well in the app.

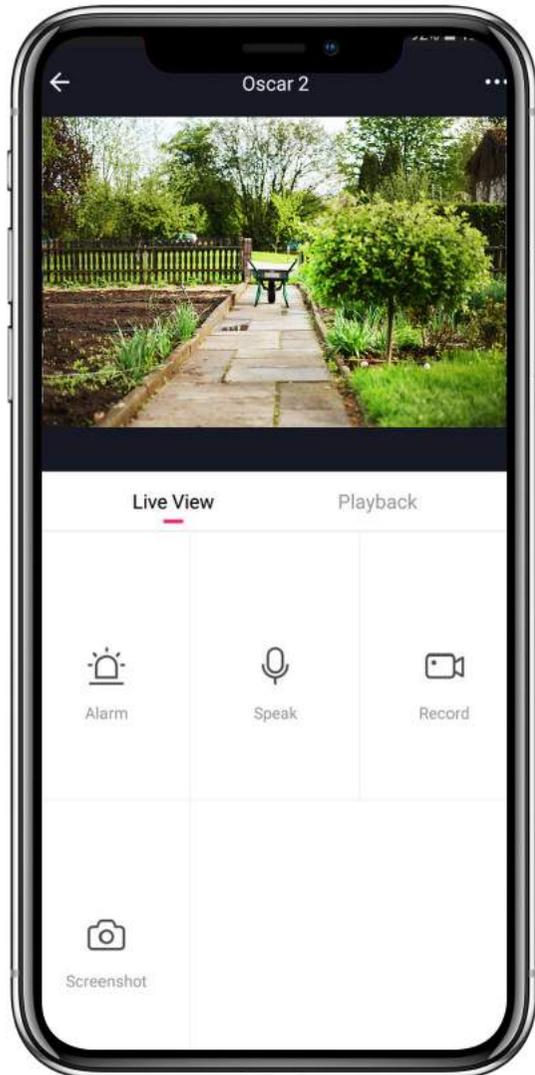

Working well? Great, continue to the next page.

Can't see the live stream? Your Wi-Fi may not be strong enough in that area, you may need to find another spot or move your Wi-Fi router closer.

Live View

Once setup is complete, select Oscar 2 in the Clan at Home app

Change the video quality from Standard definition to High Definition

Signal 93%

See your Wi-Fi Signal Strength

See Full-Screen

Turn the speaker on or off

See more Settings

Select to customise motion detection settings

Alarm

Click to turn microphone on or off

Speak

Click to record video manually, this will save to your phone gallery

Record

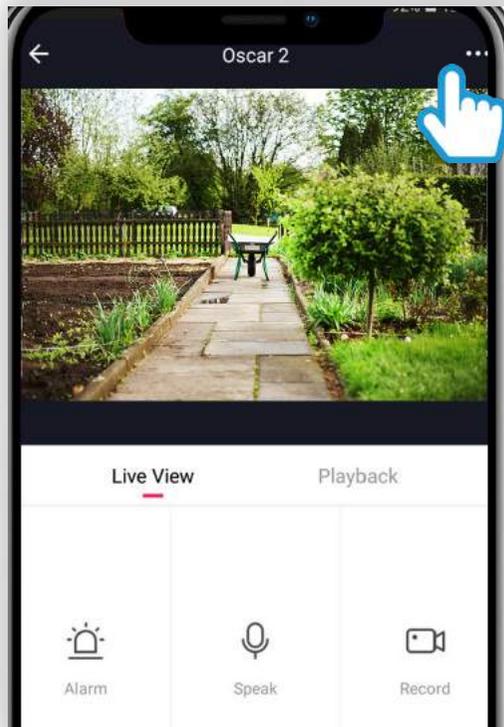

Click to take a snapshot manually, this will save to your phone gallery

Screenshot

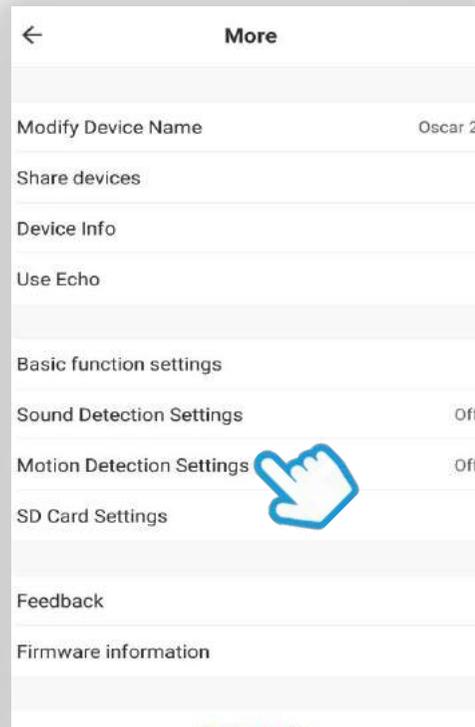

Motion and Sound Detection

To set up the Motion and Sound detection, follow the steps below:

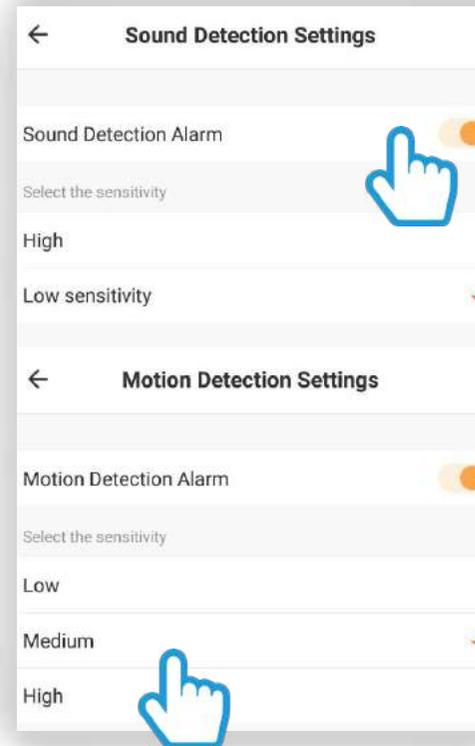

Step 1

Click on (...) to bring up the settings

Step 2

Select Sound Detection Settings or Motion Detection Settings

Step 3

Turn the setting on and choose the sensitivity

Selecting a sensitivity level minimises false alerts

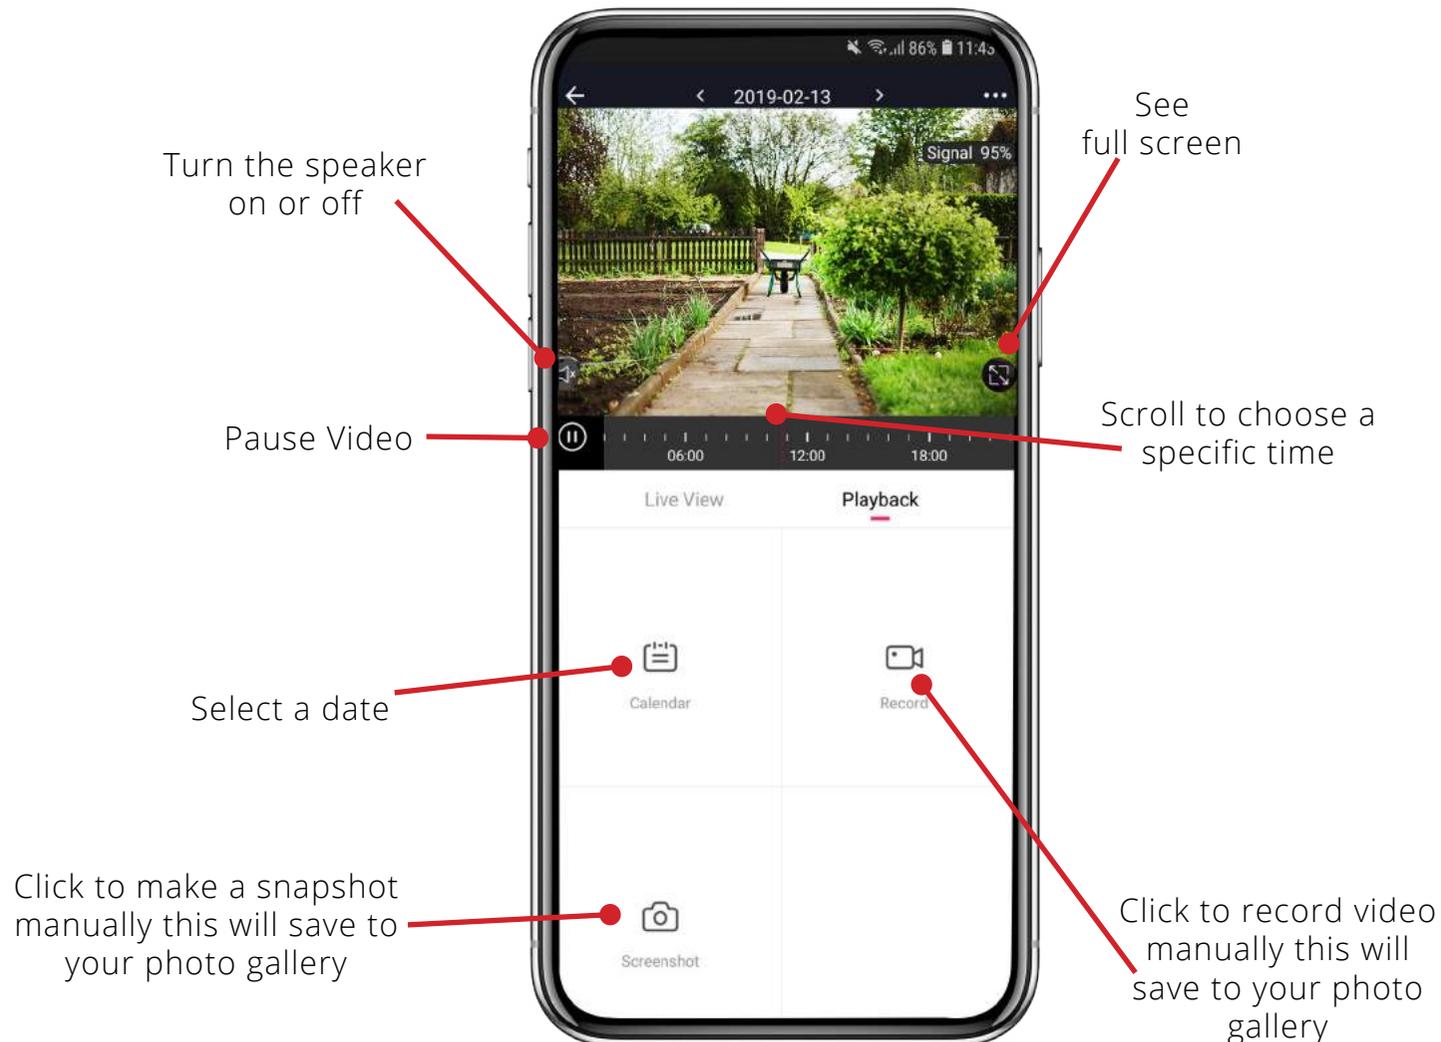

When movement or sound is detected, Oscar will send you alerts straight to your Smartphone or Tablet device.

If your device is locked when Oscar detects something, you will receive a notification on your home screen as long as you are signed in to the Clan at Home app

Recording Playback

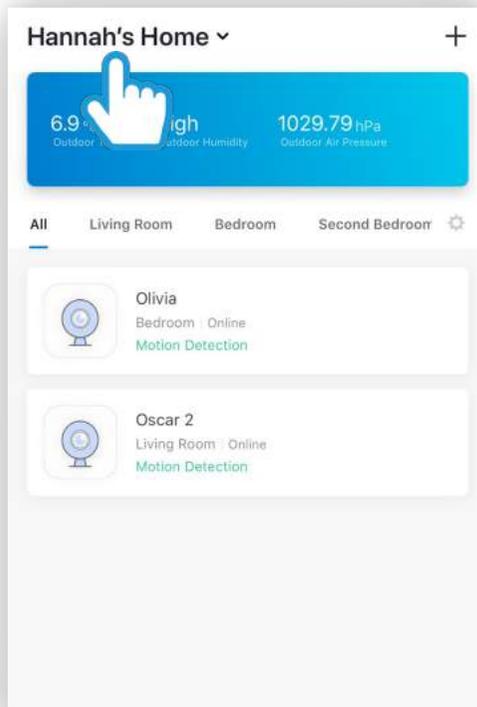

Oscar continuously records for you, so you don't need to remember to press record. The loop-recording feature automatically removes the oldest videos to make room for new ones. You can access the recordings from the Clan at Home app.

Home Management

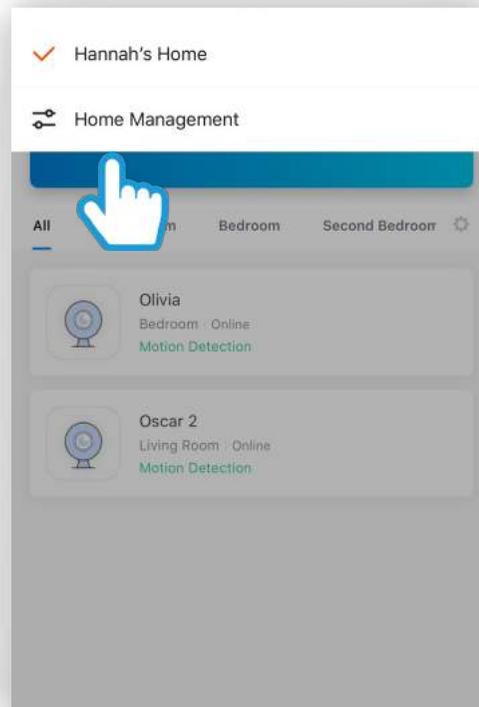

You will have created a “Home” when you registered a Clan at Home account.

To manage the settings of your home, follow these steps:

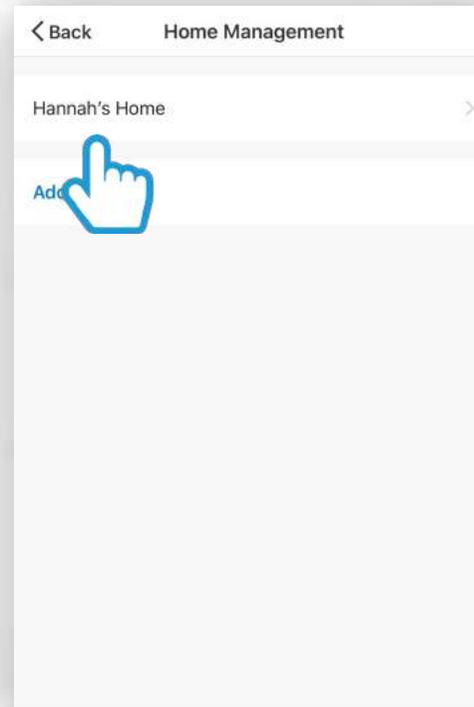

Step 1

Click on your Home name in the top left corner

Step 2

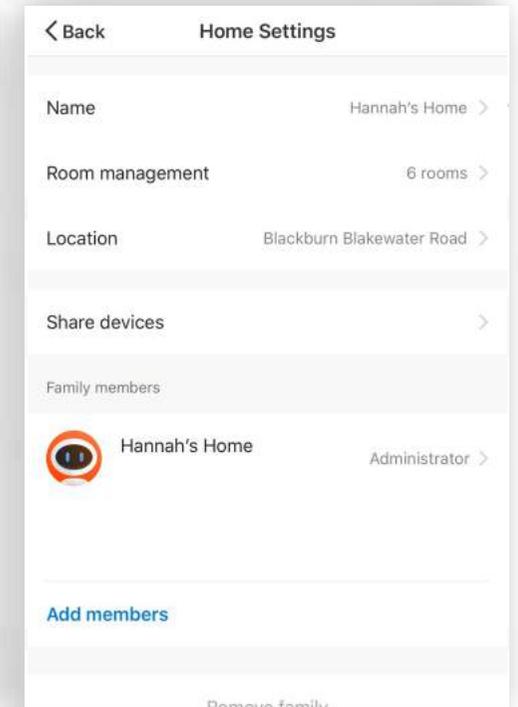

Select Home Management

Step 3

Click on your “Home”

You can also add a new Home from this page.

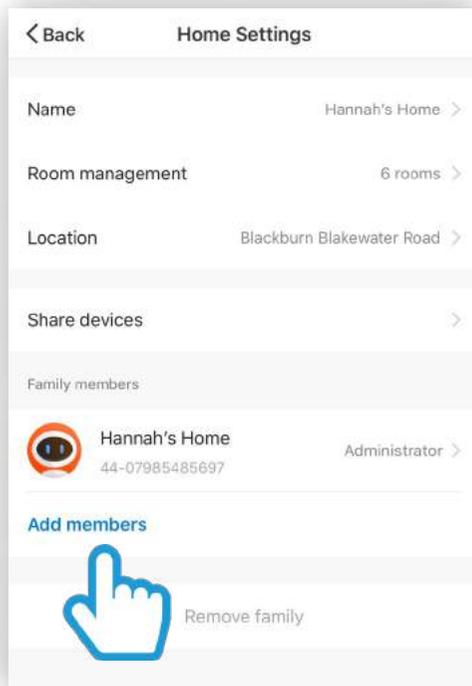

Step 4

Change settings, change location or add a family member.

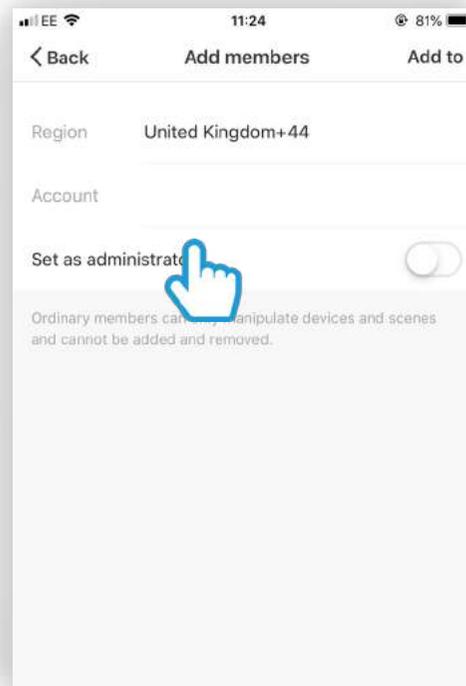

Add a Family Member

You are able to add Family Members to your home, this gives them access to all Clan devices in that home automatically so you don't have to share each device individually.

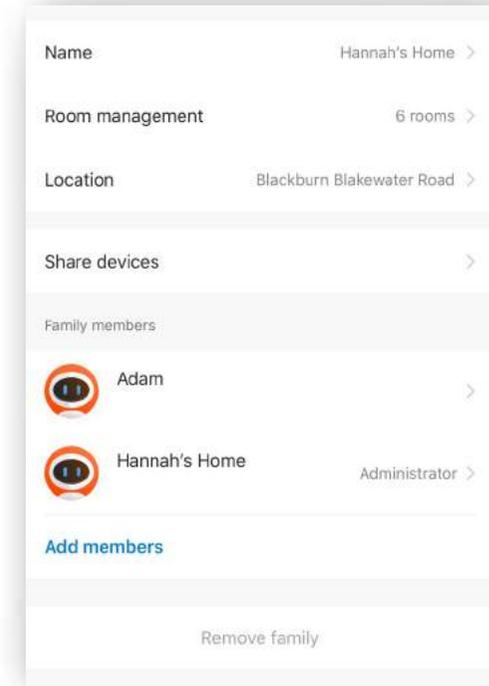

Step 1

Click Add members

Step 2

Fill in the members name and Clan at Home account details
Setting the member as an administrator gives them full access to device settings.

Step 3

The new family member will appear under the list of Family members

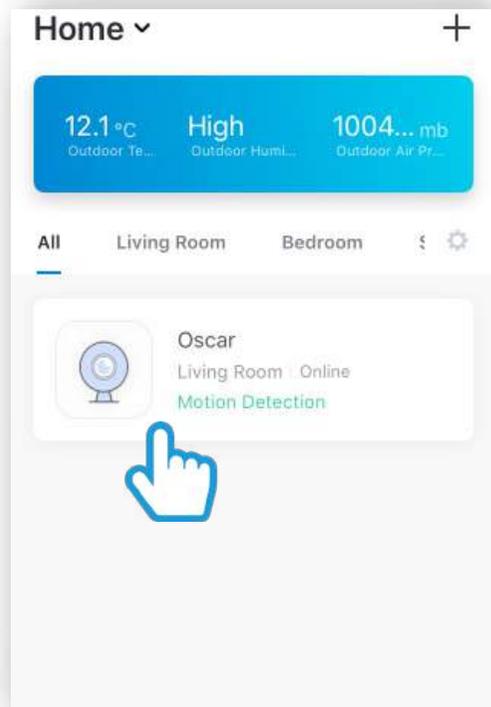

Click "Add"

Sharing Oscar 2

You are able to add share Oscar with your family and friends so they can also view the camera.

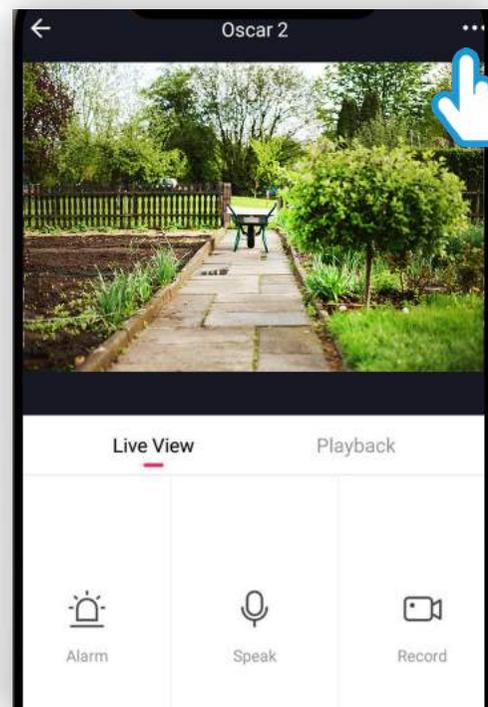

Sharing the device will only give them access to live-view, to give full access to Oscar settings, please see “Add a Family Member” on Page 9

Your family member must have a registered Clan at Home account.

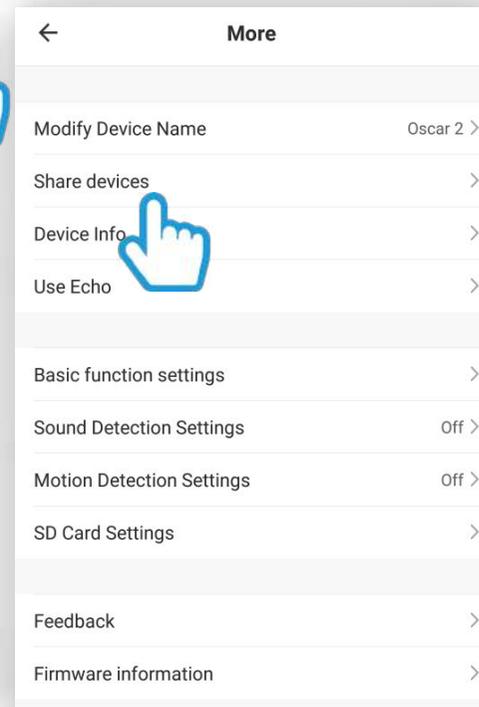

Step 1

Click on Oscar 2

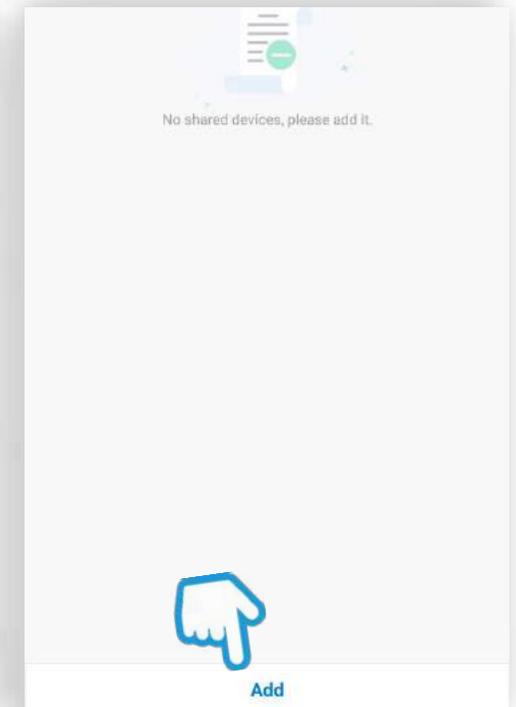

Step 2

Select (...) to bring up settings for Oscar 2

Step 3

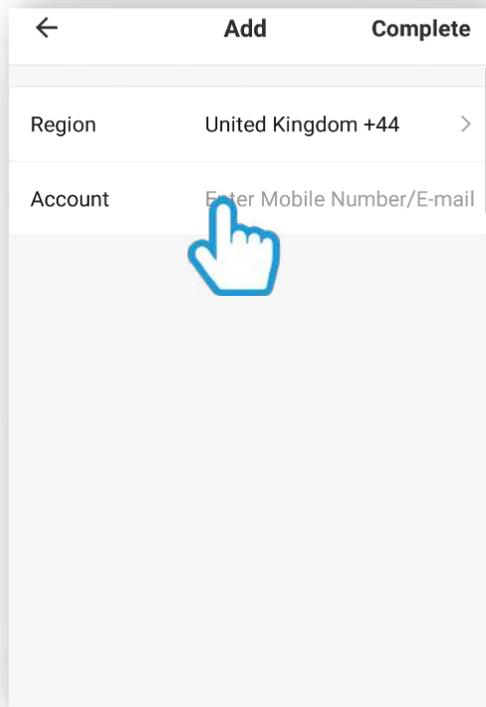

Click share devices

Step 4

Click Add

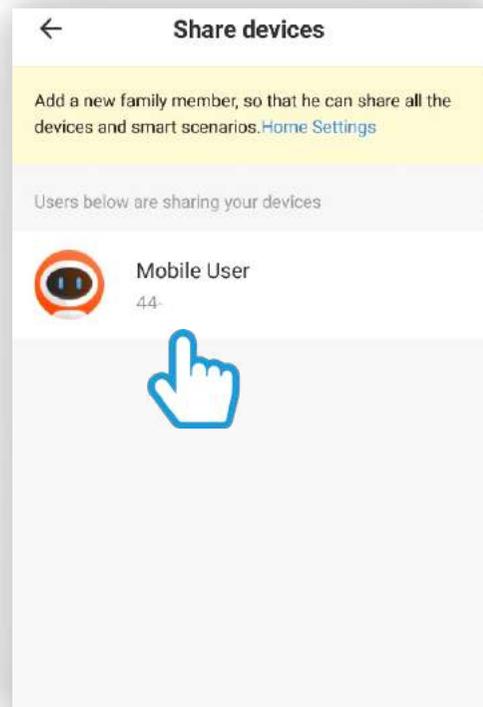

Sharing Oscar 2

Step 5

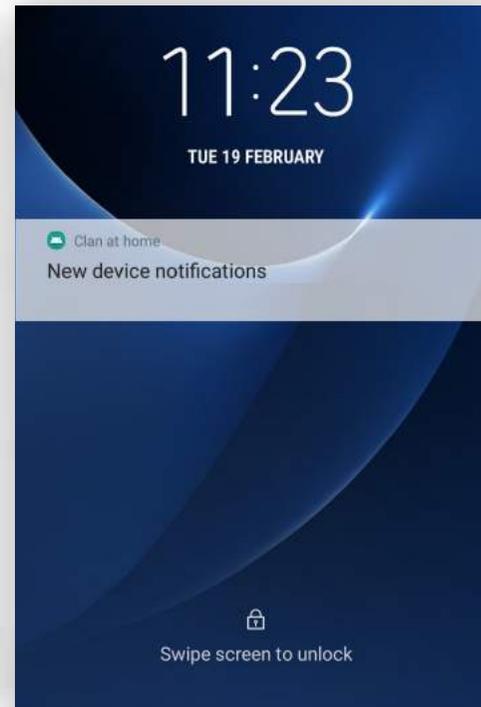

Enter mobile number/Email address use to create account

Click complete to share Oscar

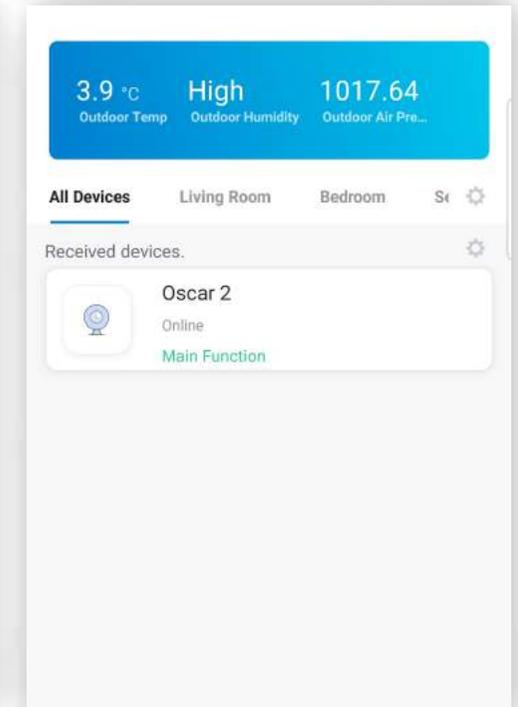

Step 6

It will now appeared as a Shared device

Step 7

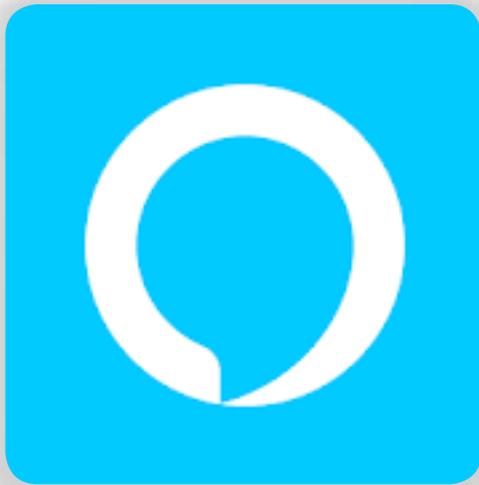

A notification will be received on the phone that Oscar 2 has been shared to

Step 8

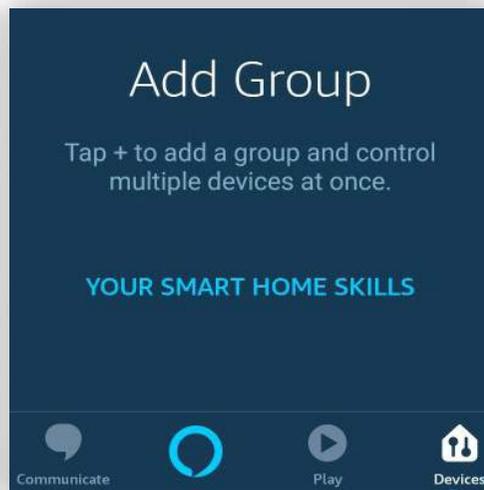

Oscar will now appear under

Control with Amazon Alexa

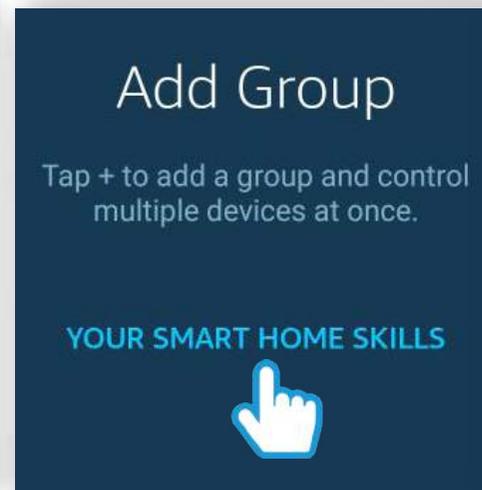

Step 1

Open your Amazon Alexa App

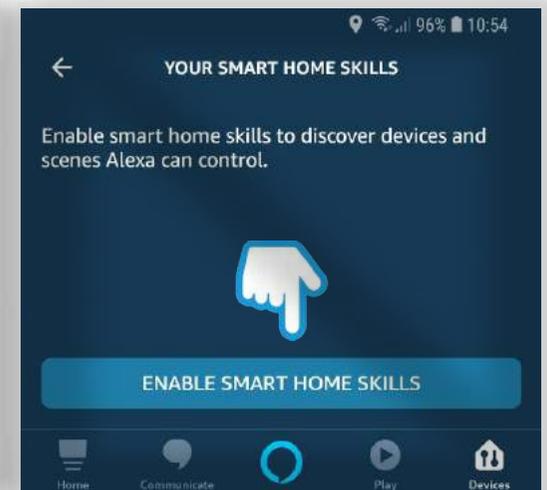

Step 2

Tap the "Devices" icon on the toolbar at the bottom of the screen

Step 3

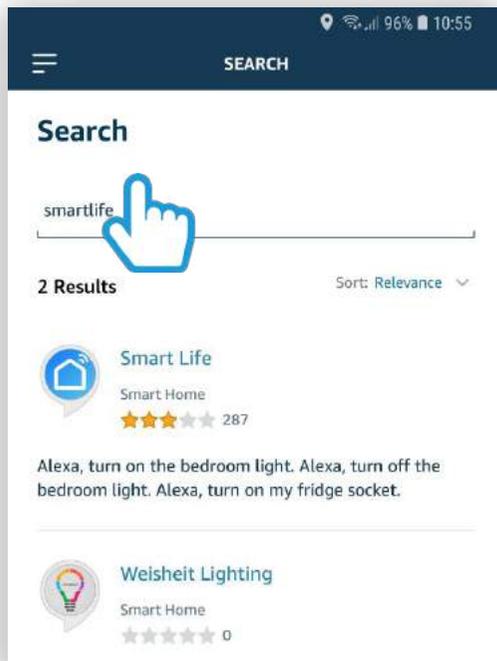

Tap "Your Smart Home Skills"

Step 4

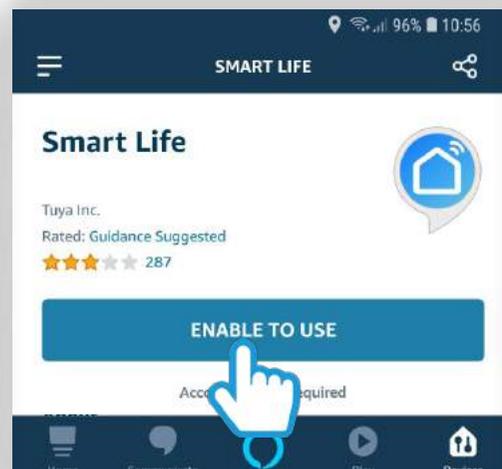

"Enable Smart Home Skills"

Control with Amazon Alexa

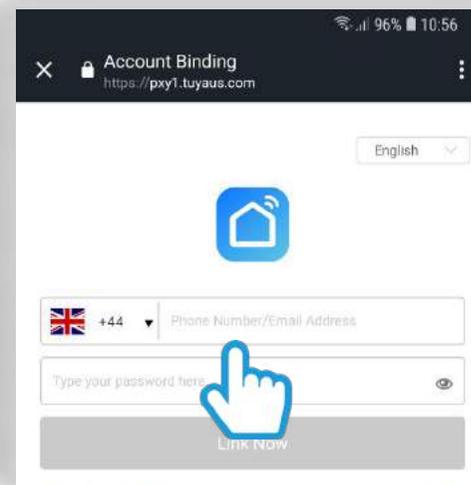

Step 5

Tap the “Search” icon on the top-right corner of the page and search “Smartlife”

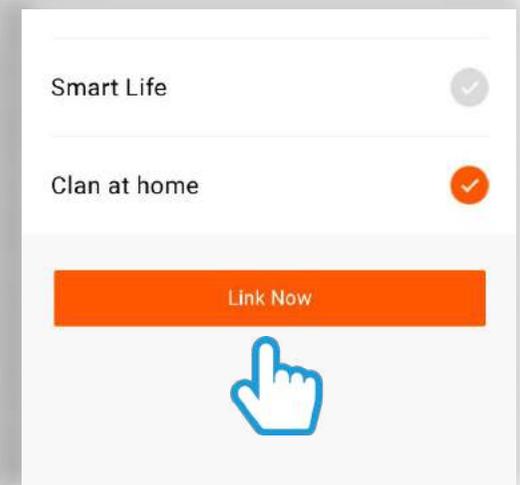

Step 6

Click the “Smart Life” skill then tap “Enable to Use”

Step 7

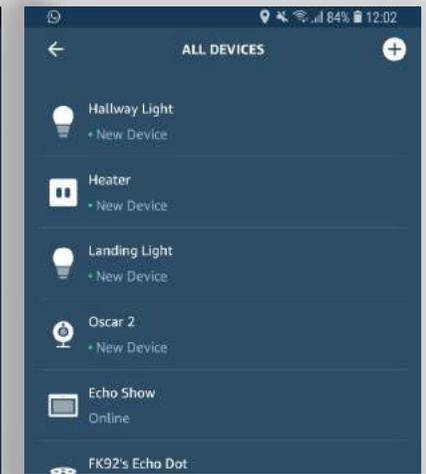

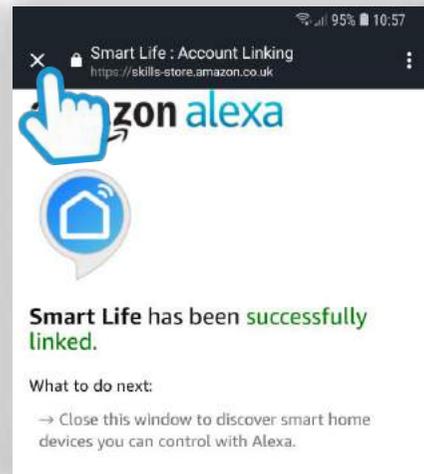

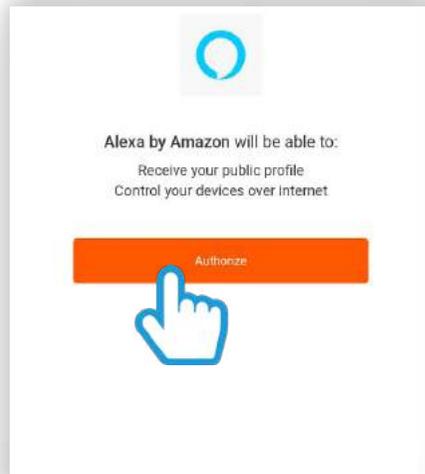

Use your Clan at Home Username and Password to log in. Then tap “Link Now”

Step 8

Choose the Clan at Home app and tap “Link Now”

Control with Amazon Alexa

Step 9

Then tap "Authorize"

Step 10

Once the link is successful, tap the "X" icon on the top left corner

Step 11

Then Tap "Discover Devices"

Step 12

Alexa will now search for compatible devices

Step 13

Once the compatible devices have been discovered, you can control them using Alexa

Safety Information

These instructions are intended to ensure that user can use the camera correctly to avoid danger or property loss.

Only use the original power adapter and accessories from the manufacturer.

Do not connect several cameras to one power source as adapter overload may cause over-heat or fire hazard.

Do not place the camera in extremely hot, cold, dusty or damp locations (the operating temperature should be -20°C ~ $+55^{\circ}\text{C}$)

Do not drop the camera or subject it to physical shock. If you notice any smoke, odours or unusual noise coming from the camera, immediately unplug from power, and then contact Time2 customer services.

It is not permitted to open the camera yourself or to have it opened, neither is it permitted to repair the camera yourself or to have it repaired. This will void the warranty.

Disconnect the camera from all power sources before cleaning it. Use a clean, dry cloth to clean the product.

Do not use any abrasive agents, corrosive cleaning products or any substances that contain bleach or solvents to clean the camera.
