This user manual has all the information you need to make the most out of Oscar 3 Outdoor Camera. Please keep this manual for future reference and ensure you have read all safety instructions carefully before use.

The manual is subject to change without notice. The updates will be added into the new version of the manual.

What you'll need

This is what you will need to set up your Oscar3 Outdoor Camera

Wi-Fi broadband

A working internet connection on a 2.4Ghz frequency channel

Compatible Device

An Apple or Android Smartphone or Tablet PC

Clan at Home account

Download the Clan at Home app and register

Indoor Mains Power Supply

Direct access to an indoor power socket

Phillips Bit

A power drill with Phillips driver bit

Drill Bit

To install on surfaces such as brick or concrete

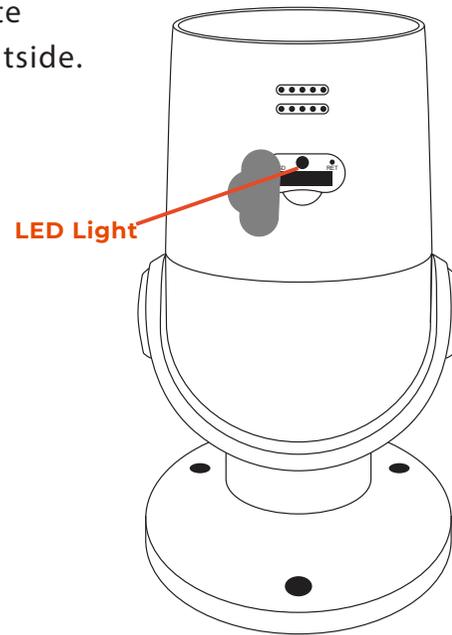

Let's get started

Power up Oscar indoors

Please turn Oscar on and complete set up indoors before taking it outside.

Using the power adapter provided, connect Oscar to a mains socket in the same room as your Wi-Fi router.

The red LED will come on once plugged in and Oscar will chime when it is ready to connect.

What do the flashing lights mean?

Solid Red
Starting up

Flashing Red
Ready to connect

Solid Blue
Connected

Add Oscar to the Clan at Home App

If you're setting Oscar up for the first time, you will need to:

1. Download the Clan at Home app from the Google Play Store or Apple App Store
2. Open the app and "register" to create an account
3. Create a Home
4. Then add Oscar

If you already have a Clan at Home account, simply press the "+" icon on the top right corner and follow the on-screen steps.

You will be asked to enter your Wi-Fi router password and use Oscar to scan the QR code created on your smartphone, then Oscar will connect to your W-Fi network.

If you need help with this, please refer to the Quick Start Guide included with Oscar3.

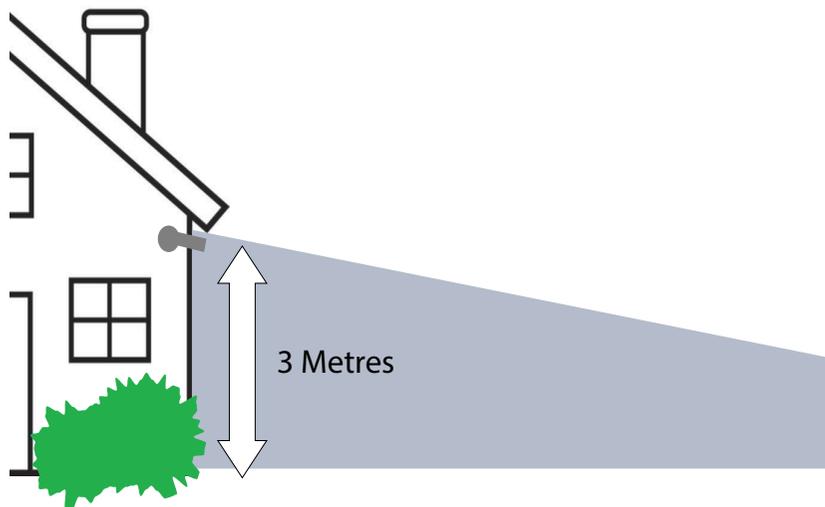

You can also watch a video on how to set up Oscar3, visit: www.time2technology.com/product-downloads

Installing Oscar

Choose a good spot

Oscar3 has an adjustable head and a wide field of view so you can position it in any direction you want.

We recommend that you mount Oscar at around 3 metres above the ground, this is the ideal position for Oscar to sense movement, see faces and talk through the speaker and microphone.

Ensure that Oscar is mounted in a position that allows you to see over a large area of your home and surroundings with an unblocked, clear view.

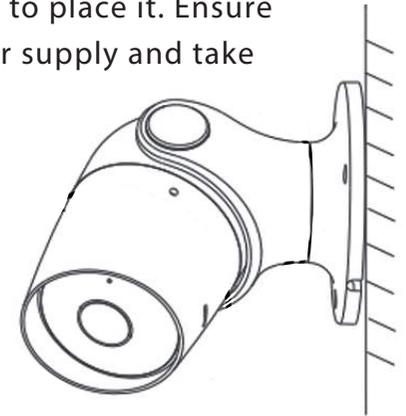

Test the Wi-Fi signal

Before mounting Oscar, we recommend that you test the Wi-Fi strength in the area that you'd like to place it. Ensure Oscar is still plugged in to a mains power supply and take it outdoors.

Hold Oscar in the position that you would like to mount it and check that the live stream is working well in the app.

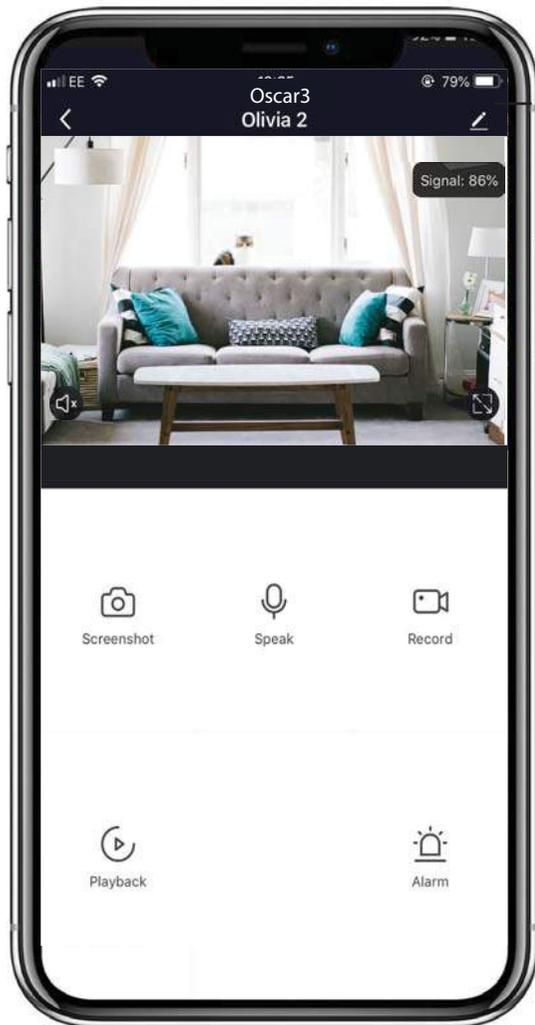

Working well? Great, continue to the next page.

Can't see the live stream? Your Wi-Fi may not be strong enough in that area, you may need to find another spot or move your Wi-Fi router closer.

Live View

Once setup is complete, select Oscar3 in the Clan at Home app

 Signal: 86%
See your Wi-Fi Signal Strength

 See more Settings

 See Full-Screen

 Turn on to get instant alerts to your phone when there's movement
Alarm

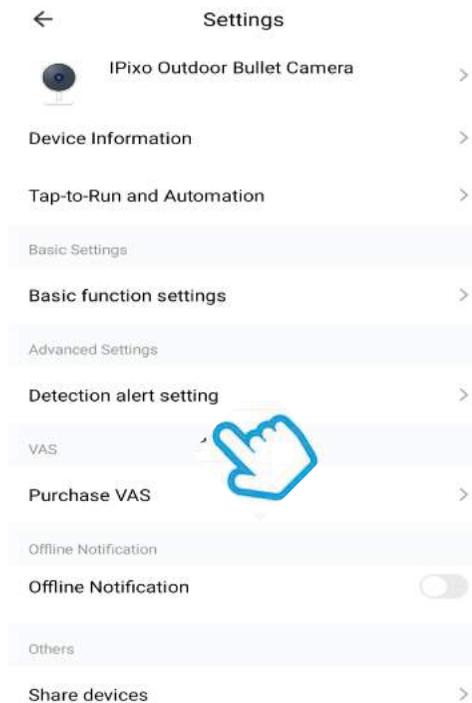

Motion and Sound Alerts

To set up the Motion and Sound detection, follow the steps below:

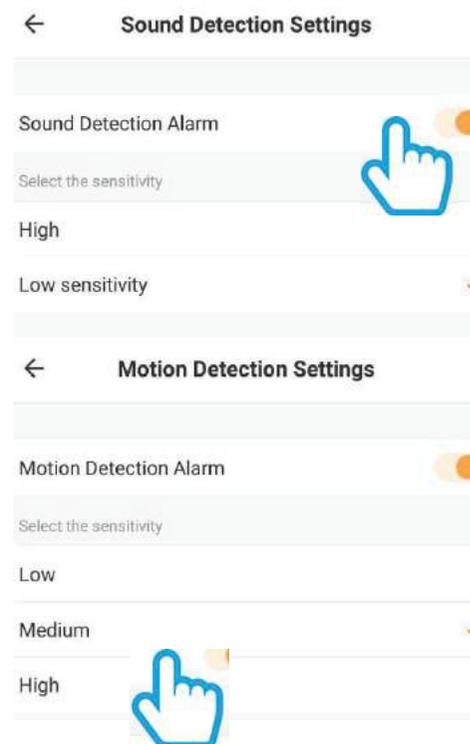

Step 1

Click on the settings icon to bring up the camera settings

Step 2

Select Detection alert setting

Step 3

Turn the setting on and choose the sensitivity

Selecting a sensitivity level minimises false alerts

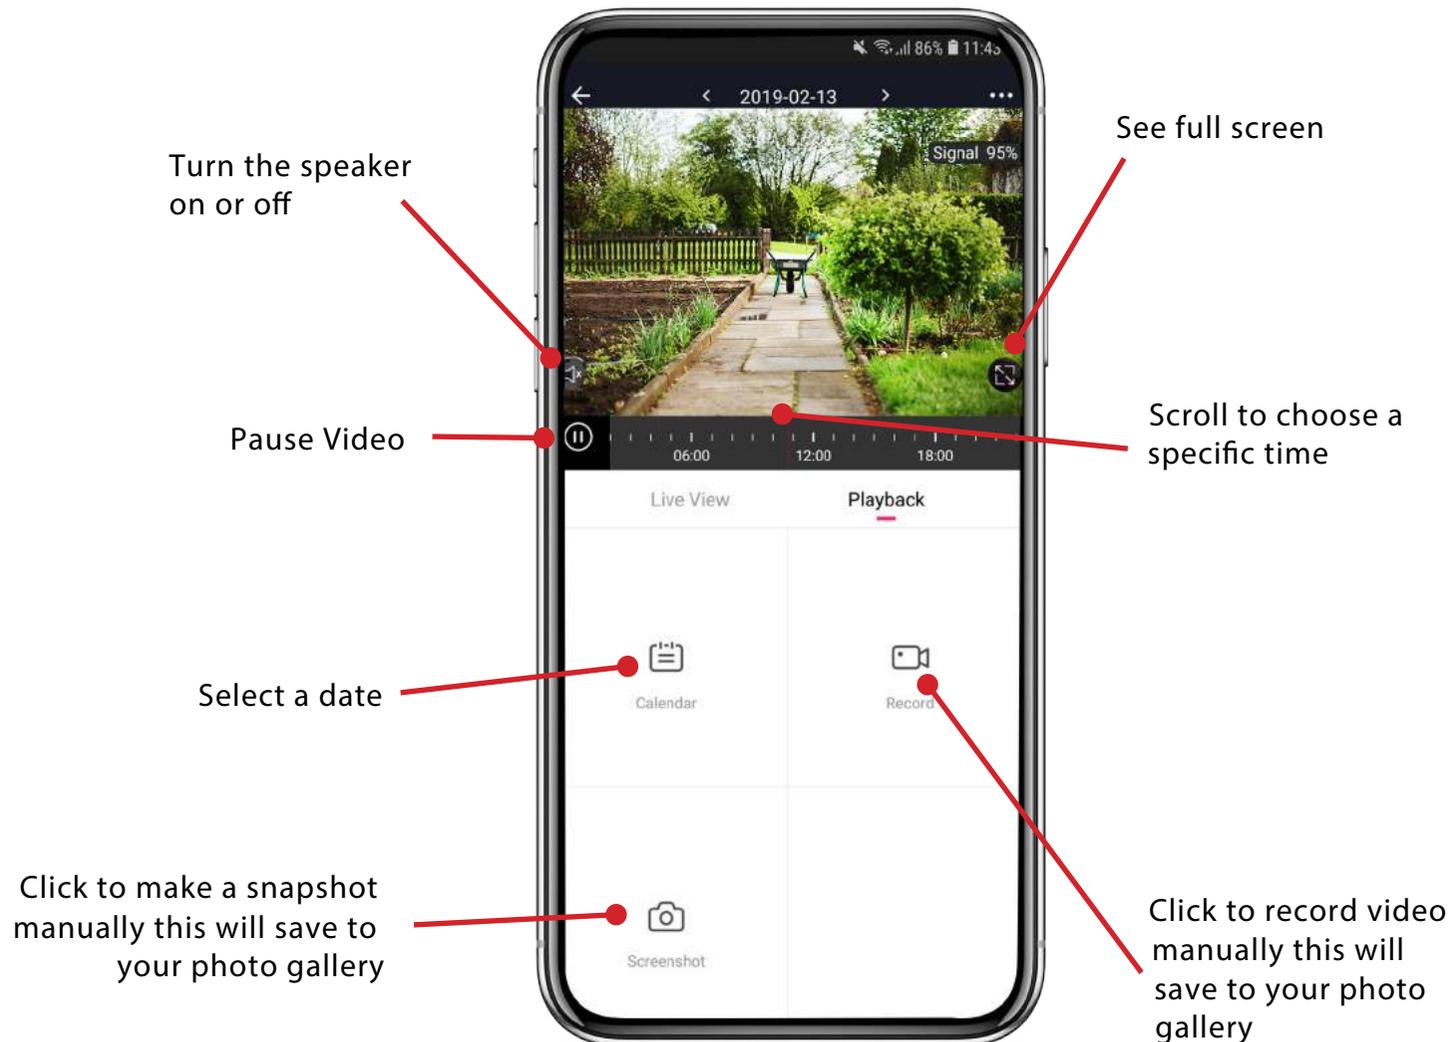

When movement or sound is detected, Oscar will send you alerts straight to your Smartphone or Tablet device.

If your device is locked when Oscar detects something, on your home screen as long as you are signed in to the Clan at Home app

Recording

Oscar continuously records for you, so you don't need to remember to press record. The loop-recording feature automatically removes the oldest videos to make room for new ones. You can access the recordings from the Clan at Home app.

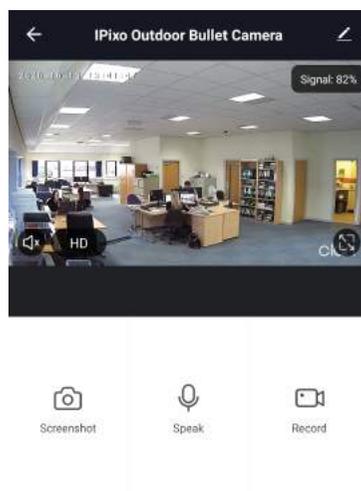

Cloud Storage for a single camera

If you would like Oscar to record, you will be required to inset a Micro SD card

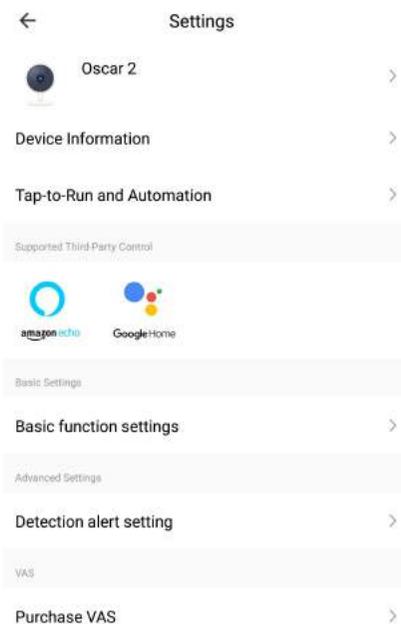

Alternatively, you can sign up to the optional cloud storage.

The camera can be set to record continuously or once it detects movement. You can also choose to store the recorded footage for 7,14 or 30 days.

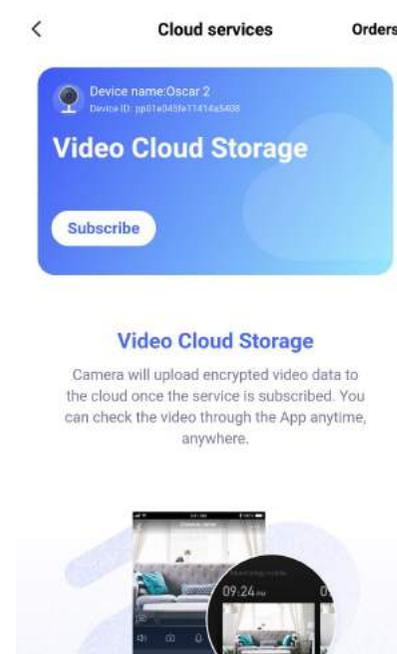

Step 1

Click on the pencil icon

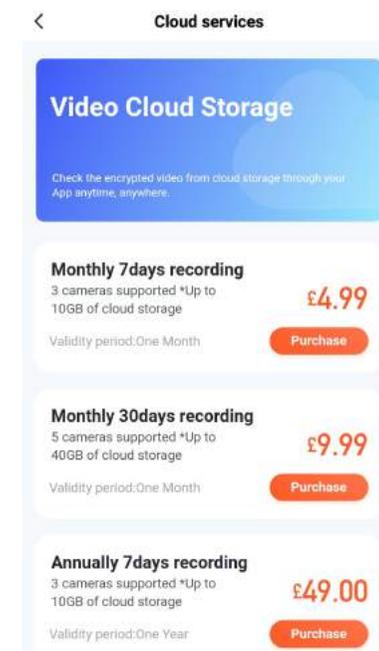

Step 2

Click on Purchase VAS

Step 3

Click Subscribe

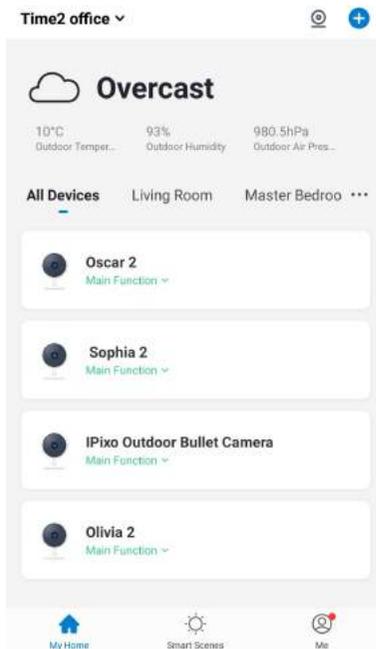

Step 4

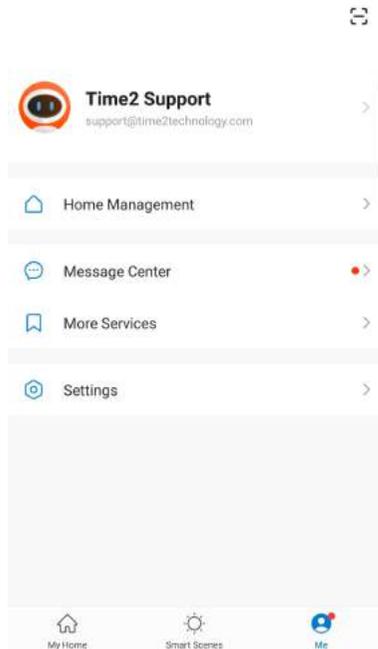

Choose which service you would like. You will be then directed to make the payment.

Cloud Storage for multiple cameras

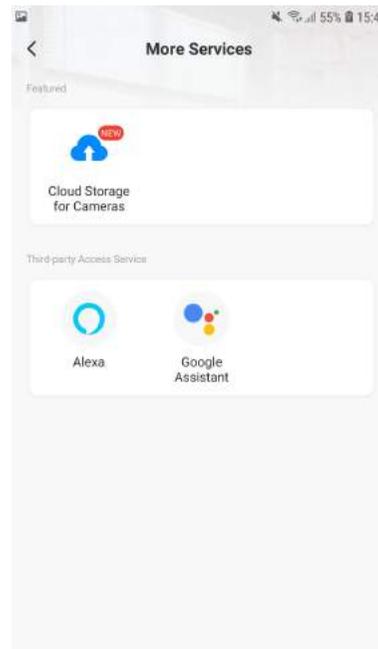

Instead of paying per camera why not bundle your Cloud Storage.
Please note selecting this option will only set the camera to record when it detects movement.

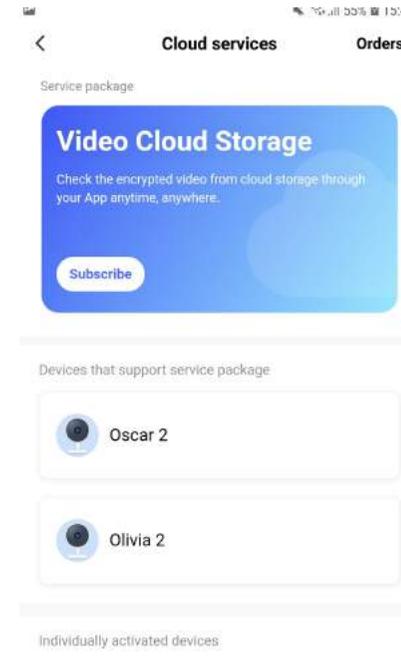

Step 1
Click 'ME'

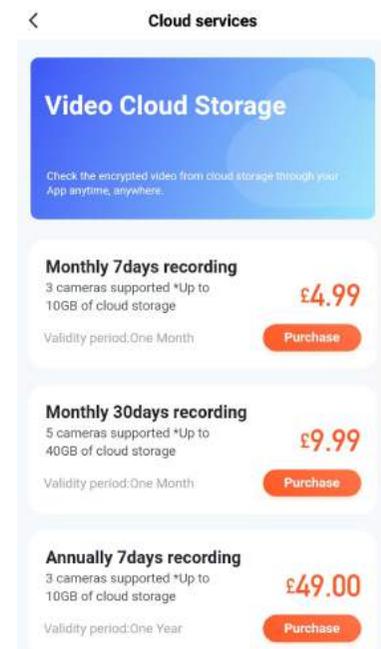

Step 2
Click 'More Services'

Step 3
Click 'Cloud Storage for cameras'

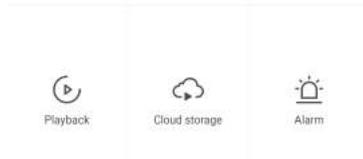

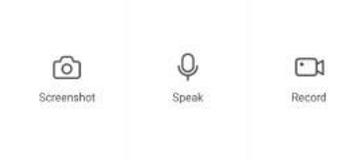

Step 4
Click 'Subscribe'

Step 5
Choose which service you would like.
You will then be directed to make the payment.

Cloud Storage Recordings

Oscar will record for you so you don't need to remember to press record.
You can access the Cloud recordings from the Clan at Home App.

Step 1

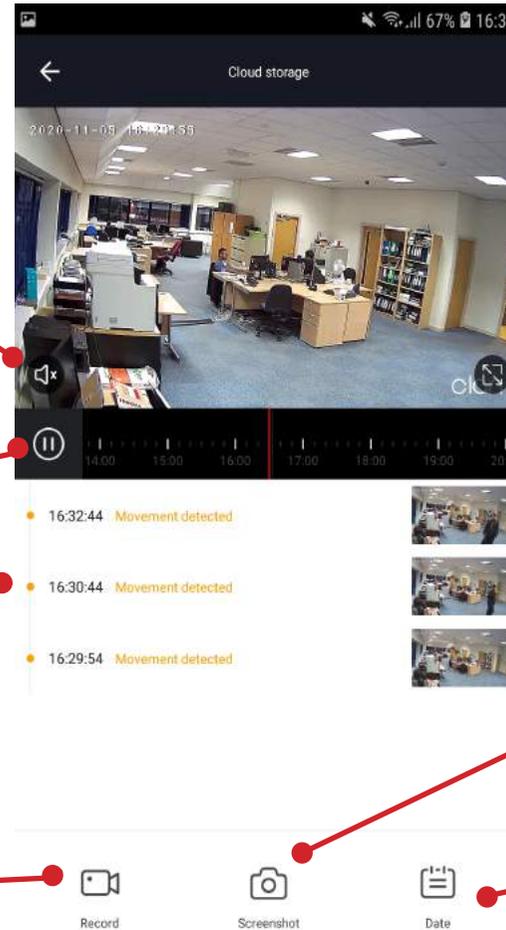

Click on 'Cloud Storage'

Turn speaker on or off

Pause Video

Choose a specific recording when camera has detected movement

Click to record

See Full Screen

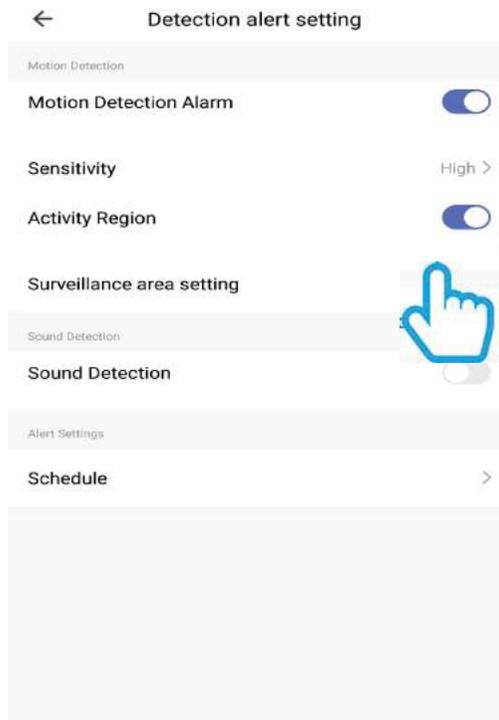

Scroll to choose a specific time

Click to make a snapshot manually

Select a date

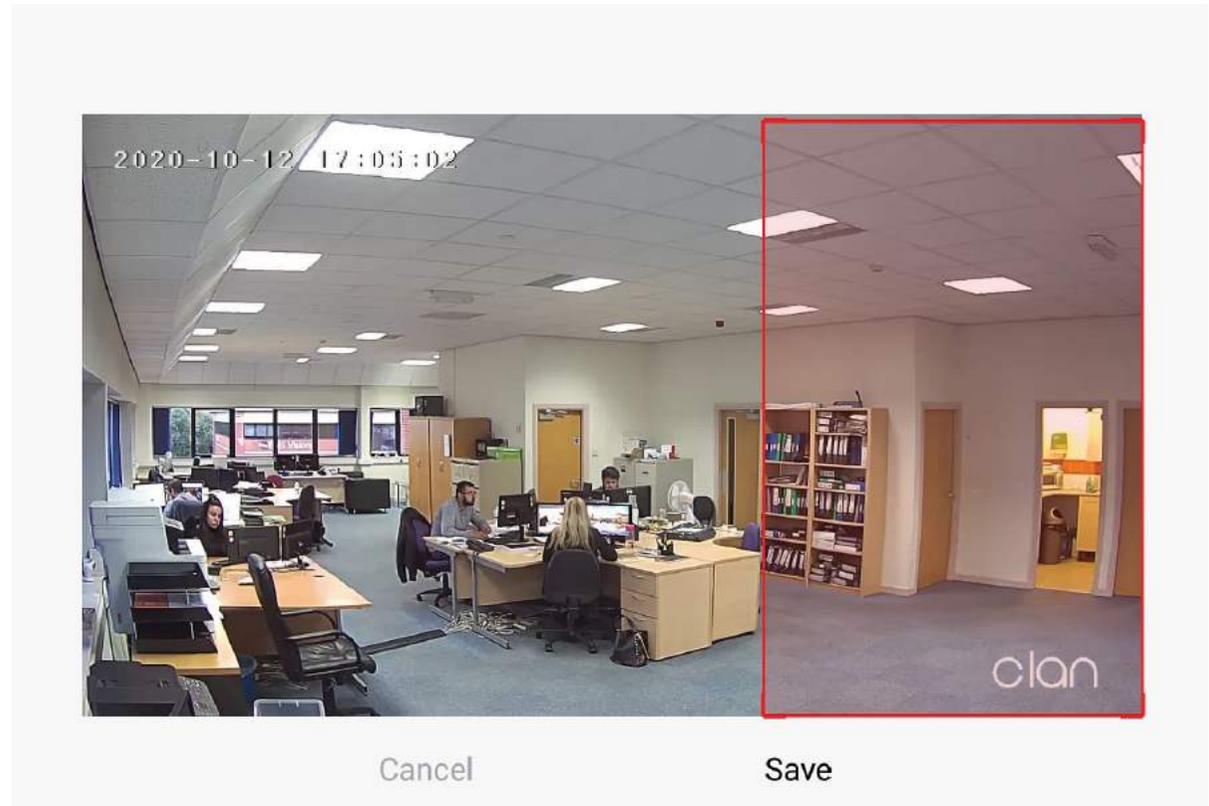

Area Detection

If you would like your camera to monitor a certain area please follow the steps below:

Step 1

Click on Surveillance area setting

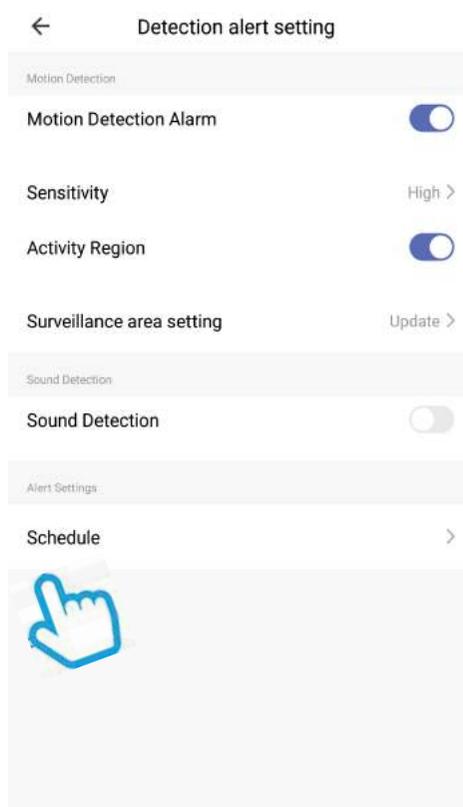

Step 2

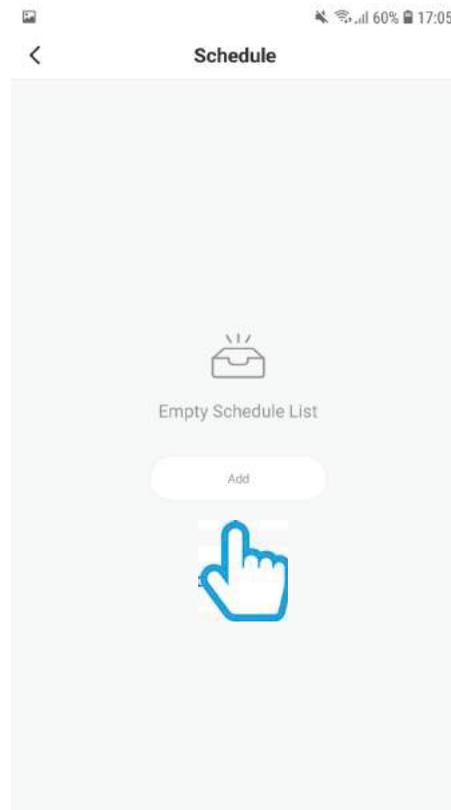

Select the area you wish to monitor,
then click save

Schedule

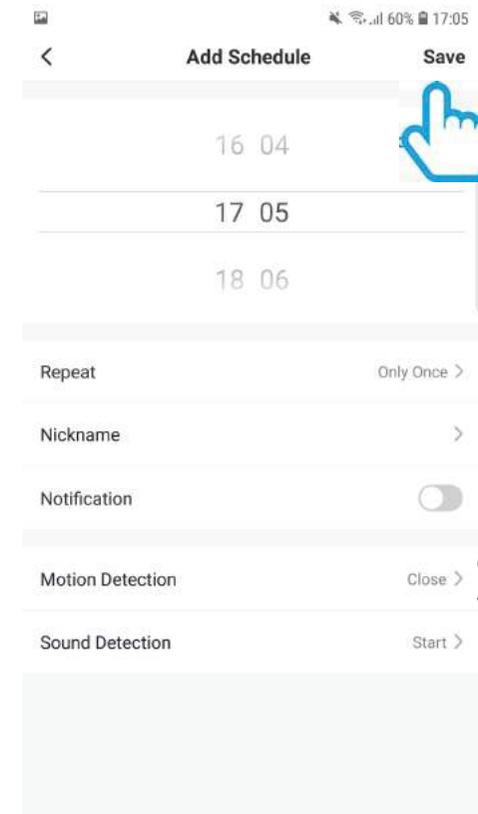

Choose when to set your camera to detect motion or audio.

Step 1
Click on schedule

Step 2
Click Add

Step 3
Set your schedule and click save in the top right corner

Select the days.

Name your schedule.

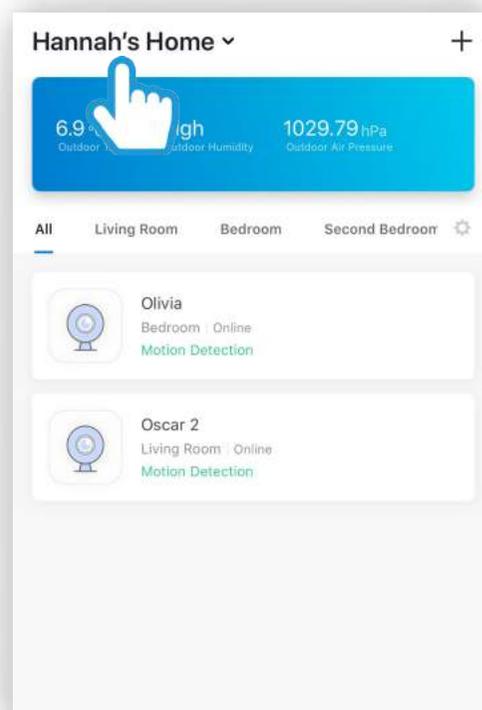

Receive a notification when it starts.

Choose the functions you would like to set.

Oscar3 and Google Chromecast

You are able to view Oscar3 on your TV using the Google Chromecast.

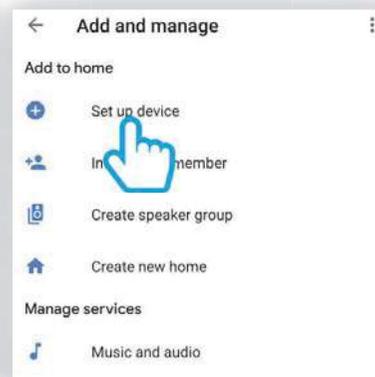

Step 1

Click in to your Google Home App

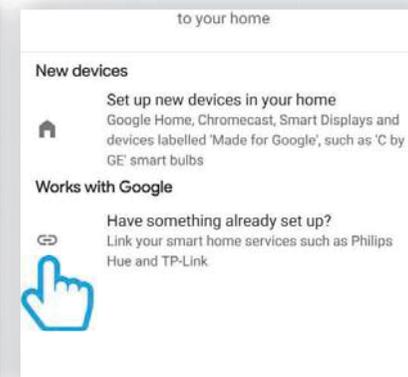

Step 2

Find the "Add" icon

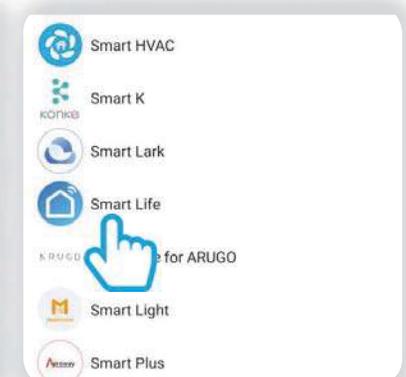

Step 3

Click "Set up device"

Step 4

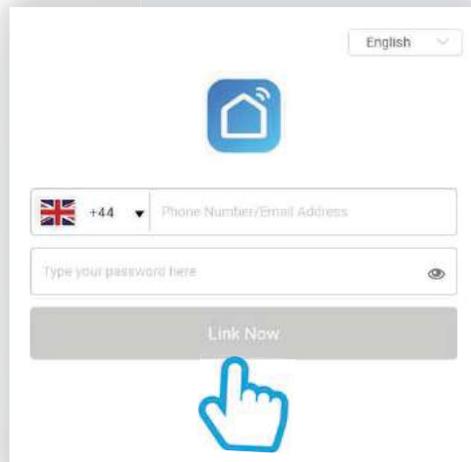

Then select the "Works with Google" option

Step 5

Scroll down the list to select "after Smart Life"

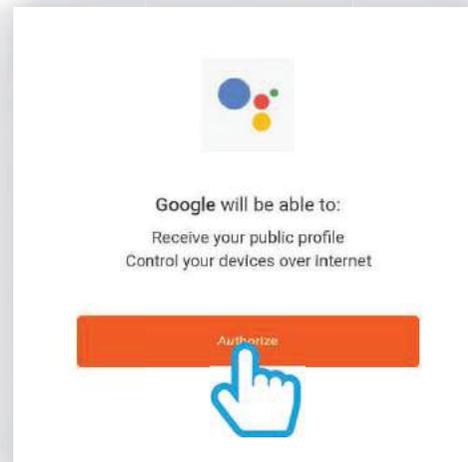

Oscar3 and Google Chromecast

Step 6

"This will take you through to a login page"

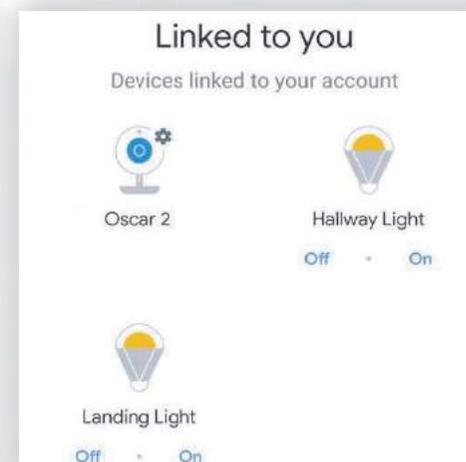

Simply enter your "Clan at Home" account details and click "Link Now"

Step 7

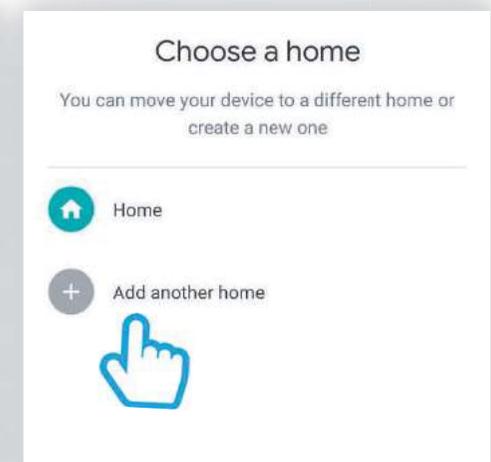

You'll be asked to authorize Google to access your devices.

Click "Authorize"

Step 8

Your Clan device will then appear under "Linked to you". You can add the device to a room so you can voice commands such as "Hey Google, Turn the Lamp in the Living Room Off" "Lamp in the Living Room Off"

Safety Information

These instructions are intended to ensure that user can use the camera correctly to avoid danger or property loss.

Only use the original power adapter and accessories from the manufacturer.

Do not connect several cameras to one power source as adapter overload may cause over-heat or fire hazard.

Do not place the camera in extremely hot, cold, dusty or damp locations (the operating temperature should be $-20^{\circ}\text{C} \sim +55^{\circ}\text{C}$)

Do not drop the camera or subject it to physical shock. If you notice any smoke, odours or unusual noise coming from the camera, immediately unplug from power, and then contact Time2 customer services.

It is not permitted to open the camera yourself or to have it opened, neither is it permitted to repair the camera yourself or to have it repaired. This will void the warranty.

Disconnect the camera from all power sources before cleaning it. Use a clean, dry cloth to clean the product.

Do not use any abrasive agents, corrosive cleaning products or any substances that contain bleach or solvents to clean the camera.
