Outdoor Camera Smart phone Setup Guide

Outdoor Camera

Connecting the Camera

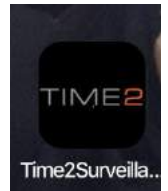

1. Screw the WiFi Antenna into the gold screw at the back of the camera.
2. Plug the power adapter into the power port lead attached to the camera.
3. Plug one end of the Network>Ethernet cable into Ethernet port lead attached to the camera and the other end into your WiFi Internet Router. It will take approximately 30 seconds for the camera to power up.
4. Once the power cable and Ethernet cable have been connected, you will hear a faint click to indicate the camera has been connected.

Smartphone Setup

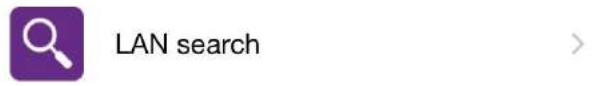

1. Download the Time2 Surveillance pro APP from the Apple Appstore or the Google Playstore.

2. After opening the APP click on the **Add Device** tab

3. You can set the camera up by either scanning the **QR Code** or Via the **LAN Search**.

4. If using the **LAN Search**, click the the **LAN Search** tab and select your camera.

5. Once you have selected your camera, the camera information will be filled. Please leave the **Password field empty**.

6. Click **Done** to save your settings.

7. For extra security you will be asked to to change the **username** and **password**. Click on the camera and it will take you to the user settings.

8. Change the details for the **Administrator only** and click **Done** to save your changes.

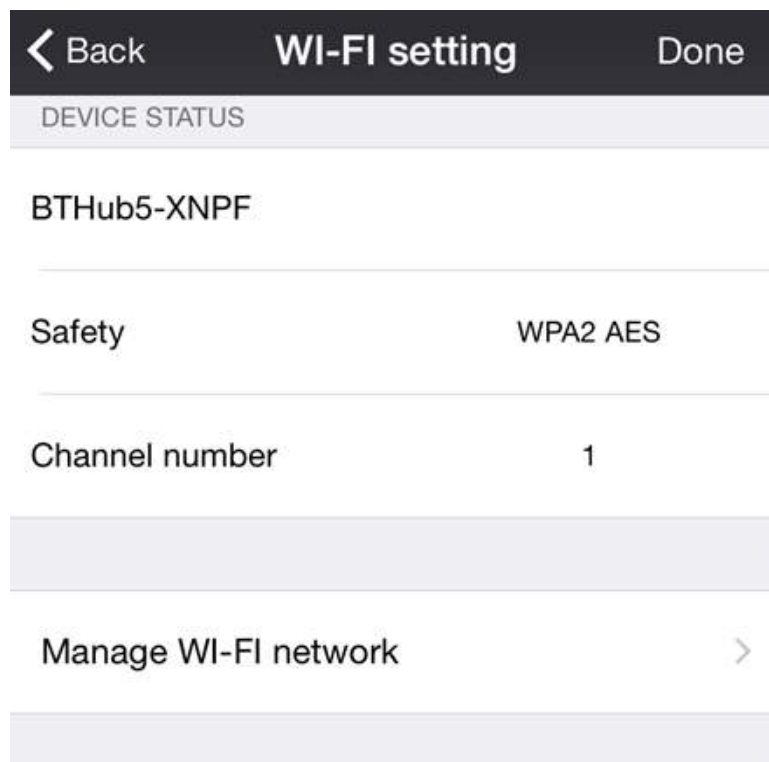

A screenshot of a user settings form. It consists of three vertically stacked input fields. The first field is labeled 'User name:' and contains the text 'admin'. The second field is labeled 'Password:' and is empty. The third field is labeled 'Show password' and has a toggle switch to its right, which is currently turned off. A thin horizontal line is positioned below the form.

9. Once the camera appears online click on the camera to view the Live Feed.

Wi-Fi Setup

Using this setting you can set the camera to function over your wireless network.

Please note: When setting the camera up for the first time, it will need to be wired into the internet router first.

Click **“Manage Wi-Fi network”** to search for networks your camera can connect to. Click on the network you would like the camera to connect to.

Enter your network password then click **“Done”** in the top right hand corner and remove the Ethernet Cable.

The camera will automatically configure itself with the router. Once this is complete the camera will restart and the connection will be established.

Camera Controls

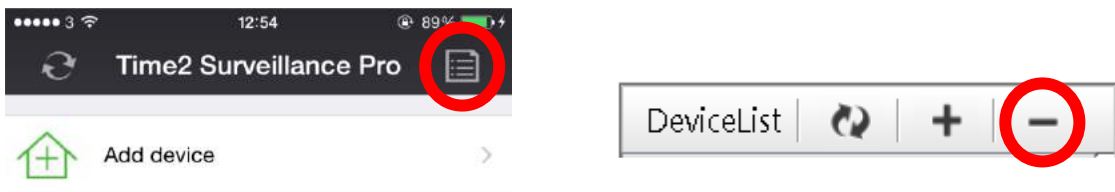

Simply swipe in any direction to move the indoor rotating camera. Other actions available are below:

Please note the outdoor camera is a static camera and cannot pan/tilt.

	Left and Right Reversal
	Up and Down Reversal
	Left and Right Cruise
	Up and Down Cruise
	Mute
	Snapshot
	Recording
	Resolution Switch
	Preset Point Setting
	Brightness Setting
	Contrast Setting
	Parameter Reset
	Infrared

Camera Reset

1. Remove the camera on the software by clicking the minus button. If you are accessing the camera from the Mobile Phone application click on the “Device Management” icon on the top right hand corner. Your camera will appear with the trash can icon next to it. Simply click on this to remove it from the application.

2. Remove the Ethernet cable from the camera.

3. Ensure the power cable is inserted.

4. Press and hold the reset button that can be located under the rubber cap on one of the leads attached to the Outdoor Camera until you hear a faint click.

Once the reset has been completed you will be required to carry out the initial setup for the camera (start from page 3).
